

TIGER

Triggered Investments in Grouping of Buildings
for Energy Renovation

 **1.500**
Apartments

 **16M €**
for investments

 **58**
Municipalities

TIGER project focuses on **social housing (SH) energy renovation interventions** expecting an investment over **16M€** through Energy Performance Contracting (EPC). It engages over **1.500 families** living in **126 SH buildings** located in Italy's **Abruzzo region**.

For the first time there is a **fully regional geographic approach** - all **5 local SH operators** are engaged. Also the funding mechanism is innovative combining EPC with other financial instruments to trigger investments by ESCOs.

TIGER addresses **energy poverty** by improving **energy efficiency**, reducing **energy consumptions** saving 8,7GWh/y of primary energy and reducing CO2 emissions of 1760tCO2/y, contributing to **decarbonising** buildings.
